# "Youth" International Poster Design Exhibition

## On Youth

"Youth" Themed International Poster Design Exhibition approaches youth not merely as a stage of life, but as a dynamic field of expression shaped by intellectual, cultural, emotional, and social experiences. Aiming to make visible concepts such as identity, belonging, transformation, and freedom through the visual language of graphic design, the exhibition brings together contemporary perspectives from designers across different countries on a shared platform. In this respect, the exhibition is not only a space for visual exchange, but also an international platform that encourages reflection on the individual and social experiences of youth. Showcasing the critical and creative potential of graphic design, these works invite viewers to engage with the multilayered narratives of youth while fostering new avenues for thought and discussion within contemporary visual culture.

## Marked Then discarded

Marked identities are often reduced to labels imposed from outside. Once defined, they are easily dismissed, excluded, and discarded—leaving little space for belonging.

**I DON'T FIT**

The statement 'I don't fit' directly expresses young people's inability to settle into the roles and molds imposed on them. This poster makes visible a state of youth that overflows the spaces it is expected to belong to, seeking to create room for itself.

I DON'T  
BELONG  
HERE

The statement 'I don't belong here' expresses a sense of alienation and a search for a place to be accepted within predefined spaces and identities.

This poster reflects a youth that questions where it is expected to belong, revealing a search for place, identity, and self-definition.

Rather than acceptance, it emphasizes the need to redefine belonging on one's own terms.

Sometimes, even when we look, we fail to see the truth. Small details, hidden meanings and subtle connections often escape our attention. Yet when we pause and truly focus, the unseen begins to reveal itself. It's in these moments of awareness that we discover the stories hidden in plain sight.

Seeing the unseen is not just about using our eyes. It's about opening our minds and hearts. It's about understanding that every glance carries the potential for discovery, every detail has a purpose, and every shadow holds a secret waiting to be uncovered.

Because the more we look, the more we see. And the more we see, the more we understand.
